Company certificate

专注牙刷制造80年，始于1936年
Since 1936

● ISO9001:2008

● ISO14001:2004

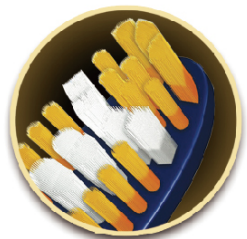

Business partners

专注牙刷制造 **80** 年
(1936年—2016年)

**Mechanical tapered grinding
bristles & Profiled hole**

Dental plaque clearance rate increased about
(compare with regular toothbrush)

30% ↑

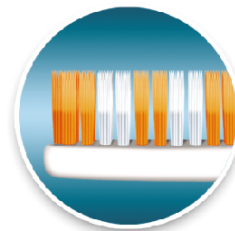

Test Area	Gingival Margin	Crevice between Teeth	Tooth Surface	Full Mouth
Dental Plaque Clearance Rate	26.85% ↑	22.84% ↑	71.15% ↑	33.68% ↑

China practical patent Profiled hole tufting technology

ZL 2010 2 0107982.1

China practical patent Mechanical tapered grinding bristles

ZL 2009 2 0232361.3

Mechanical tapered grinding bristles 物理磨尖刷毛

After patent technical grinding, the upper part bristles with formation of a unique matte surface which increases friction while brushing the teeth, make clean and protect gums easier.

Profiled hole bristles design 异型孔

Improved profiled hole bristles at the front of toothbrush, clean the parts hard to reach more efficiently.

- Four components injection handle
- Soft rubber tongue cleaner
- Massage rubber inside the bristles
- Profiled hole with mechanical tapered grinding bristles
